## Summary

I'm a self-taught Android apps developer with 6 years of experience developing and enhancing existing and new systems, including both client and server-side development.

---

## Experience

### ikva eSolutions

Self-Employed Entrepreneur • Hyderabad, Telangana

06/2017 - Present

Started [ikva eSolutions](#) to pursue my dream to become an entrepreneur. Worked comfortably with 25+ clients and delivered every project successfully on time.

### Ionixx Technologies

Android Developer • Chennai, Tamil Nadu

05/2016 - 03/2017

Built a unique Gallery app with a chat feature that integrates with multiple third-party instant messaging apps including WhatsApp. Gained real-time experience on bitmaps, background tasks, and data synchronization.

### Ionixx Technologies

Intern • Chennai, Tamil Nadu

03/2016 - 04/2016

Steered a team of 4 fresh talents to develop User and Rider Android apps for an IoT-based car parking management system from scratch.

---

## Skills

Kotlin, Java, MVVM, Hilt, LiveData, Room Database, Jetpack DataStore, Jetpack Compose, SQLite, Firebase, REST API, XML, Google Play Console, PHP, WordPress, MySQL, Tailwind, Bootstrap, Blogging, SEO, Photoshop, Filmora

---

## Projects

### Notification History Log

Side Project SOLD at 4M+ Downloads, 14K+ Reviews, 4.1 Rating

Notification History Log lets you store and manage the past Android notifications. Released in 2017 and sold 100% of ownership in 2021. The app was featured multiple times on print and digital media.

#### Project Key Features:

- *Advanced Filters with Powerful Search*
- *Backup and Restore*
- *Light and Dark Themes*
- *Free and Premium Variants*
- *Multilingual (6 Languages)*

## TechGlare Deals

Client Project: Amazon Product Advertising API, Android, Web

Developed fully functional Android and Web apps for one of the leading deal publishing services. It is one of the most challenging and interesting projects I have undertaken to date. This project required a lot of research, automation scripts, 3rd party integrations with very brief requirements from the client.

Helped the client in choosing the tech stack and made sure the backend has a lot of flexibility to let the client publish deals with very minimal effort and clicks. Under the hood, the project heavily interacts with Amazon Product Advertising API 5.0 to fetch product (deal) information automatically.

### *Project Key Features:*

- Written in 100% Kotlin
- Modern Android App Architecture: MVVM pattern, Hilt for Dependency Injection, LiveData, Room, Navigation Component, Retrofit, GSON, Paging, Firebase, Lottie, Material Design with Light & Dark Themes
- Deal Finder
- Firebase Authentication and Cloud Messaging
- Custom Web Plugin to Automate tasks

## MoviesDrop

Client Project: Watch List Organiser for Movies, TV Shows

MoviesDrop is a simple organizer app, where you can store the details of all the movies, TV series, documentaries, etc you want to watch and the ones you already watched. You also get the options to see which OTT platforms (like Netflix, Prime, Hotstar, etc.) they are available to watch.

### *Project Key Features:*

- 100% Kotlin
- TMDb Integration
- OTT Availability Information
- Firebase Storage and Authentication

## Recruitment India

Client Project: Jobs and Preparation Portal

Coded Android and web apps for the client to help their users crack job interviews with ease. The preparation portal within the app helps candidates take quick quizzes to test their skills.

### *Project Key Features:*

- Preparation Portal
- Firebase Cloud Messaging
- [WP Droid Integration](#) (One of the side projects to convert WordPress sites to Android/iOS apps easily)

## JNTU Fast Updates

Client Project: CGPA and SGPA Calculator, Education App

Students from JNTU University are notified about the exam schedules, notifications, syllabus, timetables, results, and more. Also, designed CGPA / SGPA calculator within the app to let users keep track of semester-wise results with percentages and backlogs.

#### **Project Key Features:**

- *Firestore Cloud Messaging*
- *CGPA and SGPA Calculator ([Watch demo](#))*
- [WP Droid](#) Integration (One of my side projects to convert WordPress sites to Android/iOS apps easily)
- *Custom backend to manage app content, features, and push notifications*
